MOBILISE YOUR STORAGE

HIGH DENSITY

04

**MOBILE STORAGE: PERFECT FOR STORAGE ENVIRONMENTS WHERE RETRIEVAL OF RECORDS QUICKLY AND EFFICIENTLY IS FUNDAMENTAL TO YOUR WORK PRACTICES.**

Designed for all types of media, the MTM Rollastore high density mobile storage system provides up to 80% more space capacity than standard storage units and at its most basic, houses existing filing capacities in 50% less floor space.

## **MADE TO MEASURE MOBILE STORAGE**

The MTM Rollastore delivers a precise, purpose-built, tailor-made solution. Each installation is engineered to maximise every vertical and horizontal square centimetre available and using purpose-made shelving, specifically for the items you need to store, the MTM Rollastore really is an intuitive storage solution.

# MTM ROLLASTORE

## ROLLASTORE

With mechanical mobile storage  
you can enhance your storage needs

HIGH DENSITY

### **POSITIVE DRIVE, DISCREET QUALITY**

Our mobile systems are based on a free standing, positive drive track system, incorporating a durable and light-weight bay movement mechanism for easy handling, even when laden. All MTM Rollastores are fully levelled during installation to ensure continued structurally sound and smooth movement during use.

### **REUSE, RELOCATE OR REMODEL**

The MTM Rollastore is a floor based fully re-locatable friction drive system which can be removed, reinstalled and remodelled with your changing filing requirements.

## FUTURE VISION

We continue to shape our business around four key values, developed to ensure we support our customers through the solutions we provide and the service we deliver:

- We use years of innovation to understand and solve our customers' problems
- We work in partnership with our customers' and suppliers', delivering enhanced products and services
- We deliver expertise to our customers, providing rapid support and added value by delivering efficient savings and customer based solutions
- Our customers are central to our business and everything we do.

By working as one team we have a single vision to become a leading provider of commercial storage solutions and the first choice for customers.

## OUR PROMISE

Every part of our business process is handled by people 'in the know' all dedicated to looking after your order, taking care of it every step of the way.

From order to installation, our team are here to help and support you. Our years of experience ensure we are able to guide you through every stage of your project, guaranteeing you a smooth and trouble-free installation.

## EFFICIENT, EASY TO USE AND INTELLIGENT

Intelligent electronics allow the Elise to be programmed to set security parameters, file access permissions, departmentalisation restrictions and even the systems working hours. Elise is about more than just storage; it's about efficiency and effectiveness; it's about getting to what you need quickly and easily.

## POWERED MOBILE STORAGE; ACHIEVING THE MOST FROM YOUR SPACE AT THE TOUCH OF A BUTTON.

The Elise Storage System is a defining light in the world of electrically driven mobiles. Incorporating leading technology and first class manufacturing the Elise is one of the safest powered systems available. Built-in safeguards and passive in-aisle safety systems provide automatic safety control and complete peace of mind, from small systems to multi-location installations.

STYLE YOUR STORAGE  
MINI-GLIDE

HIGH DENSITY

10

## MINI MOBILES FOR SMALL SPACES

With office space at a financial premium the drive to fully utilise every square metre efficiently has never been more important. The Mini-Glide provides an intelligent storage alternative, designed to reduce the footprint used by standard storage units whilst increasing file retrieval times and efficiencies.

The Mini-Glide is available as a double-sided office partition system, a single sided back of desk or a wall standing unit. Offered with open fronted, closed-security or personal storage unit bays, the Mini-Glide can be tailored to your specific needs and remodelled to suit any future requirements.

## SIMPLE & EFFECTIVE STORAGE

Placed at the end of a desking run this Mini-Glide unit can increase capacity threefold and allow all the filing you need in a clean and efficient layout.

## EASE OF USE AND MANAGEABLE

Based upon our standard mobile track base the Mini-Glide is a manually operated mini mobile unit with light weight bay movement functionality for ease of use.

# SLIDE2SIDE

SHUFFLE YOUR CAPACITY

When space is a premium choose Slide2Side

HIGH DENSITY

1 2

## THE NEXT EVOLUTION OF TAMBOUR STORAGE

The Slide2Side is an uncomplicated high density system that can be retro-fittable to any existing standard storage units. Using DesignLine Side Tambours or Strata Shelving the Slide2Side system incorporates two depths of units placed front to back, doubling storage capacity whilst using significantly less floor space.

## RETRO-FIT

As a rapid fit system the Slide2Side can be quickly installed, relocated and added to, ideal for rapid changing and growing environments. The floor space premium is reduced with this unique system which will effortlessly fit within your existing office environment.

# DOUBLESTORE

INTRODUCE MOTION INTO STORAGE  
This storage system keeps you organised  
and tidy on one simple movement

## **DOUBLESTORE; THE MASTER OF QUICK RETRIEVAL, SPACE EFFICIENT FILING.**

The Doublestore rotating filing station really is the answer to 'frequent access live filing' office situations; built on a revolving base the Doublestore is a manual 'push-to-rotate' system giving you access to two sides of storage and two locking faces.

The principals of the Doublestore are to provide the options of fast file retrieval, secure lock-down storage for confidential files and a space efficient storage system, without any moving aisles.

The Doublestore is a sturdy unit with an engineered light-weight rotational pod, making the system easy to use.

## **HIGH DENSITY AT IT'S BEST.**

The Doublestore unit also has a significant filing capacity, holding up to 16 rows of files - the equivalent of up to five traditional four drawer filing cabinets saving you valuable space and cost.

## **REUSE, RELOCATE OR REMODEL**

Like all our storage units, the Doublestore is a fully re-locatable system and can be moved, reinstalled and remodelled to suit your changing filing requirements.

# THE NEXT LEVEL OF SHELVING

GET CREATIVE WITH STORAGE  
STRATA

HIGH DENSITY

16

## STRATA

STYLE YOUR SHELVING  
What every shelving unit should be

## NOT JUST ANOTHER SHELF

Aesthetic features such as double skinned uprights, decorative end panels and solid backs make Strata ideal for front-of-house situations. For those less showy occasions, the single skinned option provides a functional system for archive filing, basement or back-office locations.

## INTELLIGENT & STUNNING STORAGE

Based on our traditional mobile system, Strata static shelving is sturdy, versatile and intelligently designed.

Like its sister range Liberty, Strata offers slotted lateral filing shelving, display shelving, paper racks and roll-out drawers. The Strata range however goes one step further, utilising all standard office internals such as adjustable lateral filing frames, pull-out filing frames and the new flip front storage box.

# LIBERTY

FREE UP YOUR CAPACITY

For display and storage, Liberty does both

## STACK IT, STORE IT, SHOW IT

Manufactured in the UK to stringent standards the Liberty Shelving range is a perfect product for technical offices, educational facilities and libraries. The basic cantilever structure can be tailored to suit traditional environments or dressed with decorative end panels and top caps to create a modern vibrant product.

## AT LIBERTY TO CHOOSE

Along with the myriad of finish options the Liberty range also offers a selection of height and colour options, ideal for primary schools and junior libraries – designed to inspire the next generation.

---

## CLIENT LIAISON

Each high density application is different, it may only vary by the minor of details but unique it will always be; our sales team and installation engineers are experts at site surveying and product specification; ensuring that each system is optimised for space and storage efficiency.

---

## DESIGN & MANUFACTURING FLEXIBILITY

Our products are designed in-house by qualified engineers, using sophisticated software; it is with this combination of skill and technology that we are able to provide a completely flexible solution for our customers. From customer-specific-new-product-design to changes in high density project specification, flexibility will always be an intrinsic part of who we are and what we offer.

---

## IN-HOUSE BRITISH MANUFACTURE & NATIONWIDE INSTALLATION

All of our high density storage systems are customer specified and built to order by trained manufacturing staff in the UK and are installed nationally by our own competent installation teams.

**DESIGNED

---

## TOO MUCH, TOO LITTLE & TOO LATE? WE HOPE NOT.

What started off as a fad and a news item in recent years has become a serious and understood subject; the environment and the world we live in. Are we, as a manufacturer of steel products, able to protect the environment?

We are certified and accredited to ISO 14001:2004, we run and adhere to a stringent Environmental Policy and under our ISO 9001:2008 accreditation we run a continual improvements program which looks at our production and manufacturing efficiencies.

---

## RECYCLE, REGENERATE, REUSE.

More importantly, our products are 99.9% recyclable. In fact, not only are they recyclable, the company also offers a Reuse and Regeneration Service which increases the lifespan of the product and makes it look as good as new.

We are fully supported by accredited suppliers who handle all of our recycling. It's our world as well as yours and we take that seriously.

# END OF LIFE & THE ENVIRONMENT

# STANDARDS & MAINTENANCE

## STANDARDS

As a manufacturer of products that are designed for life, consistent quality and product reliability are crucial to our business. Our products are designed in accordance with Storage Equipment Manufacturers' Association (SEMA) Best Codes of Practice and are tested to BS and EN strength, safety and reliability standards; BS EN 14073-2:2004, BS EN 14073-3:2004 and BS 4875-7:2006 Test Level 4.

Our Electrical systems are designed in accordance with The Machinery Directive 2006/42/EC, EMC (electromagnetic compatibility) Directive 2004/108/EC and The Low Voltage Directive 2006/95/EC. The compliance achieved by our Electrical systems is confirmed by the use of and declaration of the CE approval for both the electronics and the mobile systems itself.

Our paint finishes are subject to stringent testing to guarantee a quality finish to all our products; our painted substrates are tested against Cross-Cut Adhesion Standard BS EN ISO 2409:2007, Impact Standard BS EN ISO 158:2001 and Bend Standard BS EN ISO 6860:2006.

To underpin our quality ethos, we are an ISO 9001:2008 accredited manufacturer.

## MAINTENANCE - It's optional but advisable.

High density systems are a hard working system and although they are built from high quality materials and parts we would definitely suggest that a product maintenance program is put in place.

By maintaining your product you are extending its life indefinitely and protecting from mis-use or general wear and tear. Our maintenance programs are offered as an on-going rolling contract, an annual contract or an emergency call-out. Our team are on hand to guide you on the best option for your product.

**Do remember, if you have an electrical, mechanical or manual mobile you are bound by PUWER Regulations (The Provision and Use of Work Equipment Regulations 1998).**

# RAILEX PROJECTS PRODUCTS
